

Piping Vibration Types & Causes

Saturday
August 8, 2020

FREE Webinar
90 Minutes

OBJECTIVES & OUTLINE

This Webinar objective is to provide the participants with broad understanding with depth and appreciation of vibration phenomena in piping systems. It will cover:

- ~ Significance of Piping Vibration
- ~ What Vibrate in Piping Systems
- ~ Vibration Types & Categorization
- ~ Measurements of Vibration
- ~ Understanding Causes of Vibration
- ~ Approach for Solutions
- ~ Case Studies

WHO SHOULD JOIN

- Fresh Graduated Engineers
- Operation Engineers
- Reliability Engineers
- Process Engineers
- Piping Design Engineers
- Experienced vibration technicians
- Inspection Engineers & Technician
- Engineers of Petrochemicals & O&G.

Time AM	Activity
10:00 - 10:05	Brief Introduction
10:05 - 11:00	Presentation
11:00 - 11:25	Questions & Answers
11:25 - 11:30	Closing

Muhsen AlSanna'a

Presenter - Muhsen AlSanna'a

Muhsen, the presenter is an experienced Engineering Consultant in piping & pipelines with over **35** years solving various field problems in his area of expertise including piping vibration. He was involved in reviewing design projects, performing piping stress analysis. He has developed standards, research concepts & SOW. He was a leader for engineers & designers.
